

NCR / CAPA Production Build Plan

Move the NCR side from a report tracker into a quality-manager-grade corrective action workflow.

Target NCR Lifecycle

Holes To Seal

Phased Build

Output Options To Add

Phase 1	Lifecycle + Roles Status model, NCR owner, reviewer, verifier, closure guardrails.
Phase 2	Containment + Action Work Disposition fields, native corrective action tasks, evidence upload.
Phase 3	Outputs + Packets PDF packets, XLSX workbook, filtered reports, management summaries.
Phase 4	Trend + Escalation Aging, recurrence, Pareto charts, overdue alerts, quality dashboard.

NCR Detail PDF Full record, evidence, status history.	Corrective Action Report Root cause, actions, owners, verification.	Management Review PDF Executive summary by period and risk.
XLSX Workbook Filtered tabs, charts, aging, action list.	Aging Report Open, overdue, due soon, cycle time.	Pareto Export By cause, event type, department, severity.
Open Action Report Who owes what and by when.	Customer Packet External version with internal notes hidden.	Audit Log Export Change history for compliance review.

Recommendation

Build NCR as a controlled corrective-action system, not just a table of reports.

Benchmark logic aligned to common CAPA expectations: document nonconformity, investigate cause, implement action, verify effectiveness, preserve records.
